

Cost of Attendance 2026-2027

7/1/2026

Cost of Attendance Overview

The estimated Cost of Attendance below reflects one academic year of expenses for full-time, first-time undergraduate students at Valley College, listed by program. A first-time student is defined as someone with no prior post-secondary education.

Costs are subject to change and include both direct and indirect expenses:

Books: Estimated costs; purchased through the school.

Computer: Optional laptop purchase through the school.

Supplies, Personal & Miscellaneous Fees, Food & Housing, Transportation: Indirect costs paid by the student; values shown are estimates based on program length and may vary.

Housing, food, transportation, and miscellaneous personal expense estimates are established by Valley College using median economic data reviewed by the Director of Financial Aid – Compliance. These estimates are applied consistently across campuses and are adjusted based on the length of the program and the academic year requirements. Programs that require more on-campus attendance or include off-site educational learning opportunities, such as Nursing and Practical Nursing, may reflect higher transportation and living-related costs compared to hybrid programs, such as Veterinary Assistant, which require less frequent campus travel. As a result, shorter or more flexible programs will generally reflect lower total living expenses.

Note: Students enrolled in 100% online programs should not incur transportation costs.

Graduation Fees: For programs one year or less, graduation fees are included in the diploma cost but are only charged upon program completion. These fees are not included in first-year costs for degree programs.
